Server System supported	Win7/8/10/2008/2012
Management Sofwear System supported	Win7/8/10/2008/2012
Battery	3.7V (Li- Ion Batttry
Dimensi	92 * 56 * 28 mm
Weight	128 gram

Back clip design
make it easier to use

Portable neck layer,
easy to carry

Procedures:

Install the server software on the specified computer, which will act as the communication service center. Install the management tool software on any other computer. With this software, Q1 can be activated on the server and achieve unlimited distance. Accessing the server IP at any time via a mobile browser or computer browser allows you to manage all Q1 on the server, as well as create and edit channels. When Q1 is switched to setting mode, the local WiFi list can be edited through the mobile phone browser.
